

Introduction to the Proceedings of the Third International Conference on Easter Island Research: Rapa Nui Rendezvous 1993

George W. Gill
University of Wyoming

The third international conference on Easter Island research, the Rapa Nui Rendezvous, was held in Laramie, Wyoming, August 3-6, 1993. It was sponsored by the University of Wyoming, and was the first of the Easter Island conferences to be hosted in the United States. Sixty papers were presented by researchers from 18 countries. Over 250 participants attended the conference which was held in recognition of the contributions to Easter Island research made by the late William T. Mulloy, Wyoming anthropologist, and his colleagues of the 1955-56 Norwegian Expedition. The honored members of the expedition team were: Thor Heyerdahl, Ph.D., expedition leader, Kon-Tiki Museum, Oslo, Norway; Edwin Ferdon, Ph.D., University of Arizona; Gonzalo Figueroa G.-H., San Bernardo, Chile; William T. Mulloy, Ph.D. (deceased), University of Wyoming; Arne Skjølsvold, Ph.D., Kon-Tiki Museum, Oslo; and Carlyle S. Smith, Ph.D., University of Kansas.

Thor Heyerdahl and three of the other members of the team (Ferdon, Skjølsvold, Smith) were in attendance. William Mulloy, the only deceased member of the team, was represented by his widow, Emily Ross Mulloy. Since the conference, Carlyle S. Smith has likewise passed away (Dec. 13, 1993). Heyerdahl, Skjølsvold and Smith all presented papers.

The conference was made possible by generous funding from the University of Wyoming Research Office and was strongly supported in numerous ways by members of the Easter Island Foundation, University of Wyoming Department of Anthropology, University of Wyoming College of Arts and Sciences, and University of Wyoming Office of Conferences and Institutes. Members of the Rapa Nui Rendezvous Committee were: George W. Gill, Ph.D., Committee Chairman; Georgia Lee, Ph.D., Editor *Rapa Nui Journal*, Los Osos, California; Charles Love, Western Wyoming College; Emily Ross Mulloy, Easter Island Foundation; Douglas W. Owsley, Ph.D. Smithsonian Institution; and Wilhelm G. Solheim II, Ph.D. Professor Emeritus, University of Hawai'i.

Honored guests, in addition to those from the Norwegian Expedition team, were: Jacobo Hey P., Governor of Easter

Island and Alberto Hotus C., Mayor of Hanga Roa, Easter Island. Eighteen additional native people of Easter Island were in attendance. Governor Hey and Mayor Hotus both presented papers, and Sonia Haoa co-authored a paper and assisted with the conduct of the meetings.

A true Wyoming rendezvous spirit prevailed at the meeting with a wind-up ceremony and festivities at a ranch west of Laramie. Arapahoe and Shoshoni dancers performed, as well as Wyoming's leading cowboy band, and two traditional Easter Island dancers (Yenicet Araki and Nancy Manutomatoma).

The scientific papers were also quite exciting. According to Bahn (1993) who wrote up the 1993 Rapa Nui Rendezvous for the *Rapa Nui Journal*, the physical anthropology papers were the most important, and provided a highlight with a new theory on the island's colonization. Certainly other exciting new concepts were put forth as well. Two papers, for instance, dealt with recent experiments in *moai* transport, and two papers provided important information on avian extinction relating to environmental degradation on Rapa Nui and other Pacific Islands.

Thirty-one of the 60 papers were submitted for publication; two have been previously published in *Rapa Nui Journal*. These are by Pavel Pavel, "Reconstruction of the transport of the *moai* statues and *pukao* hats" (*RNJ* 9(3): 67-72); and Juan Grau, "*Jubaea*, the Palm of Chile and Easter Island" (*RNJ* 10(2): 37-43). The other editors and I have grouped the remaining papers into categories. These are indicated below along with the full list of titles of each submitted report.

The first group of papers covering various archaeological topics are contained within the pages of this issue of *Rapa Nui Journal*. The next group will appear in the next issue of the *Journal*, and the final papers will be presented in the following issue of *Rapa Nui Journal*.

For the reader's benefit the full list of published papers is provided below by author and title.
